SUMMARY

Senior SQA Engineer with 3+ years of experience delivering quality across POS, fintech/payment-integrated, market-place, social, and government-integrated platforms. Strong hands-on expertise in test automation using Playwright with Page Object Model, Selenium, Cypress, and Appium, alongside API testing, SQL validation, and JMeter performance testing. Experienced in QA and product delivery, combining hands-on testing with requirements, project coordination, stakeholder communication, UAT, and release management across complex products and integrations.

SKILLS

Testing	Functional Testing, Integration Testing, Regression Testing, Smoke Testing, Sanity Testing, API Testing, Security Testing, Performance Testing, User Acceptance Testing (UAT), Production Validation.
Automation	Test Automation, Playwright, Page Object Model (POM), Selenium, Cypress, Appium, JavaScript.
Performance	Performance Testing, JMeter, BlazeMeter, k6, Load Testing, Stress Testing.
API & Data	API Testing, Postman, REST APIs, API Authentication, SQL, Database Testing, Database Validation.
Product & Delivery	Requirements Analysis, Agile Project Management, Jira, Risk Management, Release Management, Stakeholder Management.
Tools & Methods	Jira, Git, GitHub, Jenkins, CI/CD, Docker, Confluence, Agile, Scrum, SDLC, STLC.

EDUCATION

Bachelor of Science in Computer Science, University of Engineering and Technology, Peshawar 2018 - 2022

EXPERIENCE

Senior SQA Engineer / Project Manager / Product Owner AntonX Pvt (Ltd)	Sep 2025 - Present <i>Peshawar, Pakistan</i>
--	---

- Lead QA across multiple products and own product and delivery management, requirement analysis, feature definition, Jira project management, sprint planning, release management and UAT (User Acceptance Testing).
- Developed and maintained scalable Playwright-based regression and E2E automation using Page Object Model, integrated with GitHub Actions CI/CD, with additional Selenium and Appium coverage across web and mobile platforms.
- Execute API testing, SQL/database validation and JMeter load and stress testing; investigate and resolve production issues escalated from live environments.
- Act as primary point of contact for clients and stakeholders, managing feedback, change requests and UAT through to production validation.
- Mentor junior QA engineers on testing methodology, automation practices and defect management workflows.

Quality Assurance Engineer AntonX Pvt (Ltd)	Aug 2023 - [Aug 2025] <i>Peshawar, Pakistan</i>
---	--

- Executed functional, integration, regression, sanity, API, security and performance testing across web and mobile products to ensure release readiness.
- Built and maintained automated regression suites, shifting regression from a manual release-gate activity to an every-sprint run.
- Developed sprint-aligned test plans and cases, and managed the end-to-end defect lifecycle. from logging and triage to fix verification and developer coordination, preventing defects from reaching production.

Research Assistant SEECS, NUST	Jan 2023 - Jul 2023 <i>Islamabad, Pakistan</i>
--	---

- Evaluated model performance for real-time, on-device crop disease classification in Jupyter Notebook using TensorFlow/Keras and PyTorch, measuring accuracy, precision and recall ahead of deployment.
- Collected and labeled the image datasets used to train the model for “On-Device Classification of Fruit Disease”, a research project supporting early disease detection for farmers.

PROJECTS

Edge Now POS — *Senior SQA Engineer / Secondary Project Manager*

POS • Retail • Payments • Integrations • Playwright • JMeter • SQL

- Lead QA for AntonX’s flagship multi-vertical POS platform, designing and executing functional, regression and end-to-end coverage across FSR, QSR and End to End POS workflows.
- Design and maintain a Playwright automation framework in JavaScript using the Page Object Model, and execute JMeter load and stress testing against core transaction workflows.
- Validate payment gateway integrations (Stripe, Mollie, Sumup) across transaction processing, refunds and payment status reconciliation.
- Verify cross-system order-status consistency across Order Manager, Kitchen/KOT, ServeBoard, DLVR+, Clarity and Orcaastro, investigating discrepancies via REST API and SQL checks and confirming receipt output through QZ Tray.
- Support release delivery as secondary Project Manager alongside the lead PM, covering sprint tracking, developer coordination and release validation.

Ewanc / REGA — **Real Estate Platform, KSA** — *Project Manager / SQA*

Government Integration • Advertisement Licensing • REST APIs • Verification Workflows

- Delivered REGA-integrated property listing, QR verification, advertisement licensing, and Validator API workflows.
- Validated customer features including property visit scheduling and agent chat.
- Executed API, integration, payment, and regulatory workflow testing across staging and production.
- Validate payment gateway integrations (Moyasar, STC Pay, Apple Pay, Samsung Pay) across transaction processing, refunds and payment status reconciliation.
- Coordinated development, QA, releases, and client feedback through resolution.

NOCA — **Social Networking Platform (Web & Mobile)** — *Project Manager / SQA*

Mobile Automation • Appium • JMeter • BlazeMeter • UAT

- Managed delivery of web and mobile features including business roles, events, group chat, and location-based discovery.
- Automated mobile regression using Appium (JavaScript) and conducted performance testing with JMeter and BlazeMeter.
- Managed sprint planning, Jira workflows, releases, defect tracking, and UAT sign-off.

Enzer — **Marketplace Platform** — *Project Manager / SQA / Product Owner*

- Defined product requirements and acceptance criteria across customer, merchant, organization, admin, and KPI workflows.
- Validated authentication, referral, pre-registration, subscriptions, payments, and NADRA verification integrations.
- Managed Jira backlog and release validation from requirements through production verification.
